Addition of Decimals - Guided Lesson Explanation

Explanation#1

Step 1) First we have to see what is being asked.

"Add the following numbers."

Step 2) Add as you would add whole numbers. Remember to write the decimal point in the answer.

Step 3)   36.857

            +72.131

So, the answer is 108.988.

Explanation#2

Step 1) First we have to see what is being asked.

"Add the following numbers."

Step 2) Add as you would add whole numbers. Remember to write the decimal point in the answer.

Step 3) 5.863 + 3.126

So, the answer is 8.989.

Explanation#3

Step 1) First we have to see what is being asked.

"Add the following numbers."

Step 2) Add as you would add whole numbers. Remember to write the decimal point in the answer.

Step 3)   90.438

            +05.461

So, the answer is 95.899.
