Decimal Multiplication - Step-by-Step Lesson

Solve the problem.

3.532

<u>× 658.2</u>

Explanation:

Step 1) We have to multiply the numbers just as if they are whole numbers.

3.532

<u>× 658.2</u>

Step 2) We will line up the numbers on the right. After that, starting the right, multiply each digit in the top number by each digit in the bottom number, just as with whole numbers. Then we will add the products.

3.532 <u>× 658.2</u>

7064

28256x

17660xx

<u>21192xxx</u>

<u>23247624</u>

Step 3) Now we will place the decimal point in the answer by starting at the right and moving a number of places equal to the sum of the decimal places in both numbers multiplied. Then it will be 2324.7624

So, the answer is 2324.7624.
