

Name _____

Date _____

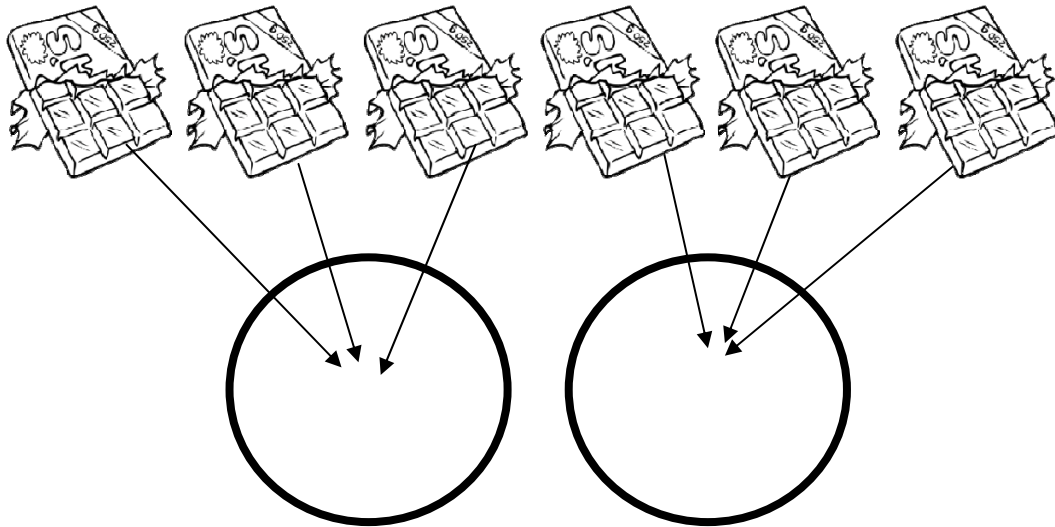

Visual Division - Guided Lesson Explanation

Explanation#1

We have 6 chocolates. We have to distribute into two even groups.

Now we will divide: $6 \div 2 = 3$.

There are three chocolates in each group. So, the answer is:

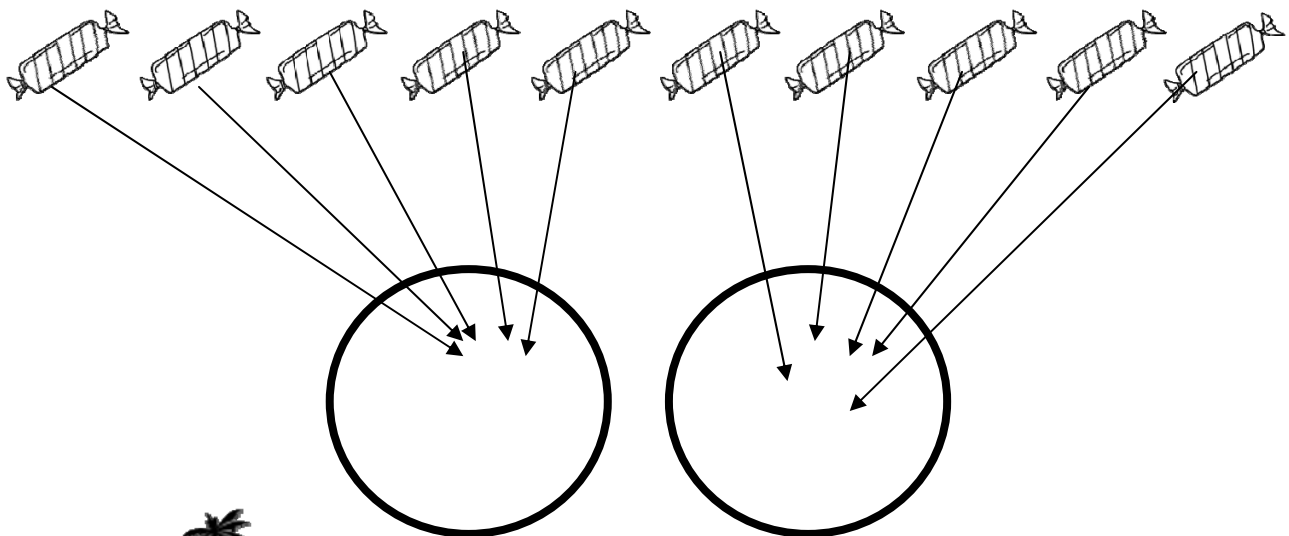

Explanation#2

We have 10 candies. We have to distribute into two even groups.

Now we will divide: $10 \div 2 = 5$.

There are five candies in each group. So, the answer is:

Name _____

Date _____

Explanation#3

We have 4 cold drinks. We have to distribute into two even groups.

Now we will divide: $4 \div 2 = 2$.

There are two cold drinks in each group.

So, the answer is:
