

Name _____

Date _____

Halfway- Guided Lesson Explanation

Explanation#1

First, we have to write down all the numbers those come in between the number 3 and 7

3 4 5 6 7

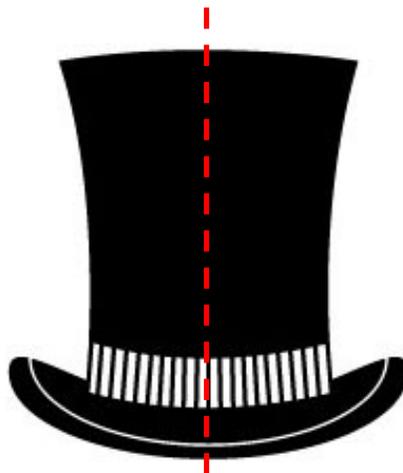

Find the number which comes in the middle of this series when we divide it into two equal parts.

So the answer is 5.

Explanation#2

Remember, the two pieces must be of equal size. Divide the magician's hat into two equal parts using a dotted line. Place the line so that you can evenly fold the 2 parts together. The only place that fits in down the middle .

Name _____

Date _____

Explanation#3

First, we have to write down all the numbers those come in between the number 11 and 19

11 12 13 14 15 16 17 18 19

Find the number which comes in the middle of this series when we divide it into two equal parts.

11 12 13 14 15 16 17 18 19
4 numbers → ← 4 numbers

So the answer is 15.
