

Name _____

Date _____

Visual Estimation- Step-by-Step Lesson

Estimate how many objects are below.

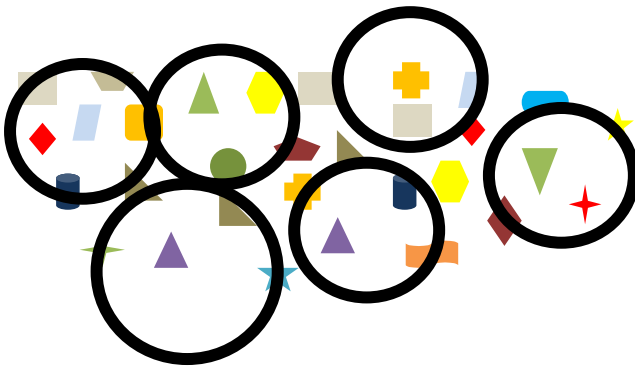

- a) 10 b) 20 c) 30 d) 40

Explanation:

I like to break images down into blocks or piles. Like when we count coins.

I like to try to get items just about the same number of items in each circle. 5 seems like a good number to work with. Let's try to see how many circles of 5 we can make.

We have 6 circles of 5. That gives us 30. Choice c.
