Date _____

Fractions of Integers- Guided Lesson Explanation

Explanation#1

Divide 72 into 6 equal groups. Like this:

$$= 72 \div 6$$

There are 12 in each group.

So, the answer is 12.

Explanation#2

Divide 150 into 5 equal groups. Like this:

$$= 150 \div 5$$

There are 30 in each group.

So, the answer is 30.

Explanation#3

Divide 20 into 2 equal groups. Like this:

$$= 20 \div 2$$

There are 10 in each group.

So, the answer is 10.
