## Mixed Operation Fraction Word Problems Guided Lesson

**1. Julia works in a deli. She slices meats and cheeses from large blocks. She was asked to prepare an order that was faxed in. The order called for meat to cut into smaller bags of  $\frac{1}{2}$  of a pound and the cheese to be prepared in  $\frac{1}{4}$  of a pound bags. The order was for 9 pounds of meat and 5 pounds of cheese. How many bags will Julia need for this order?**

**2. Marie is training for a  $\frac{1}{4}$  mile sprint track event. Her coach prepares the following weekly workout for her:**

**Monday - 3 ( $\frac{1}{4}$  mile sprints), 2 ( $\frac{1}{8}$  mile walks between sprints)**

**Tuesday – 8 ( $\frac{1}{6}$  mile sprints), 7 ( $\frac{1}{4}$  mile walks between sprints)**

**Wednesday – Rest**

**Thursday – 4 ( $\frac{1}{4}$  mile sprints), 3 (1 mile light jogs between sprints)**

**Friday - 6 ( $\frac{1}{4}$  mile sprints), 5 ( $\frac{1}{4}$  mile walks between sprints)**

**Saturday and Sunday - Rest**

**How much distance will Marie cover in a week using her coach's workout?**
