## Horizontal Bar Charts - Guided Lesson Explanation

### Explanation#1

Count the number of animals in each row.

Lions = 6, Giraffes = 4, Elephants = 3

- a) After counting all animals, we find that the lion is the choice of most children.
- b) We can see that the elephant is least in number; so it is least popular .

### Explanation#2

Orange sees to have the most balls present of the same color, so the answer is orange.

### Explanation#3

Count the number of each type of men's accessories in every row.

The hat is found the most.
