## Horizontal Bar Charts - Step-by-Step Lesson

Read the bar chart and answer the questions below:

Students were asked their favorite subject. The results of the poll can be found below.

a. Make a horizontal bar graph to display the results.

b. Which subject is the most popular?

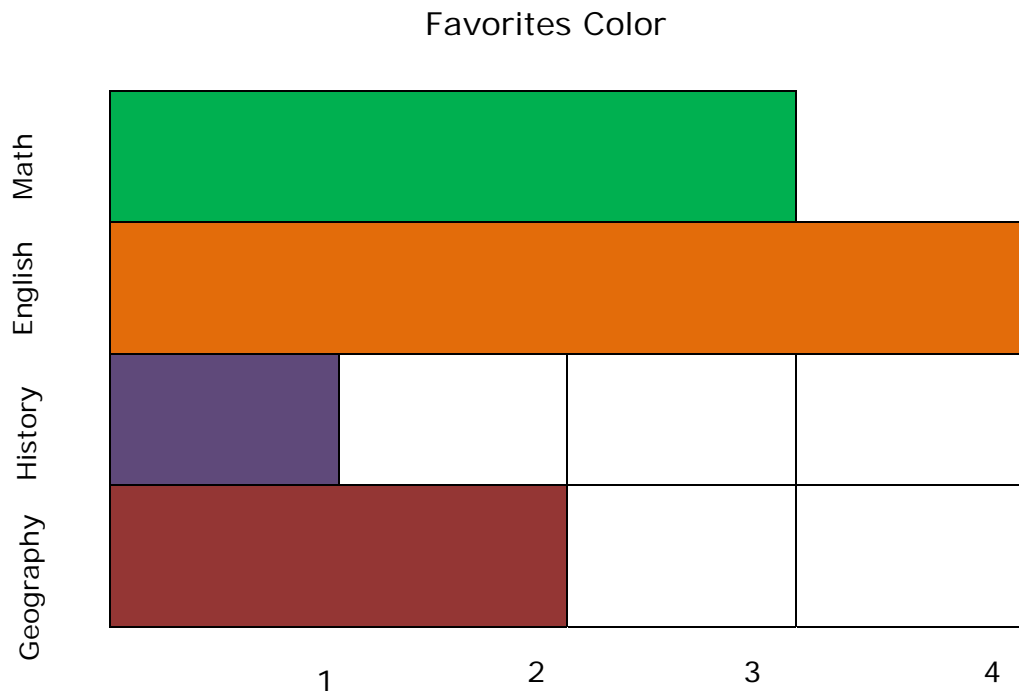

c. Which two colors had an odd number of votes?

Name \_\_\_\_\_

Date \_\_\_\_\_

**Explanation:** Enter the result in to the bar graph by creating bars that extend from the "subject" on the vertical axis up to the number of people.

b) English got the most votes, so it is the most popular.

c) Odd numbers cannot not be divided into two equal groups. History has one vote and Math has three votes. These numbers cannot be divided into two equal groups.
