

Name _____

Date _____

Calculator Fun - Guided Lesson Explanation

Explanation#1

$$5991 \times 685 + 2,081,482$$

Multiply first: $5991 \times 685 = 4,103,835$

Add: $4,103,835 + 2,081,482 = 6,185,317$

Turn your calculator upside down.

$$618 = \text{Big} \quad 5317 = \text{Lies}$$

Answer is: $6,185,317 = \text{Big Lies}$

Explanation#2

$$\text{Calculate } 8^6 + 99,636$$

Exponents first: $8^6 = 262,144$

Add: $262,144 + 99,636 = 361,780$

Turn your calculator upside down.

Answer is: $361,780 = \text{Oblige}$

Explanation#3

$$6^3 \div 4 - 14$$

Exponents: $6^3 = 216$

Divide: $216 \div 4 = 54$

Subtract: $54 - 14 = 40$

Turn your calculator upside down.

$$40 = \text{Oh}$$
