Topic : Integer Word Problems- Worksheet 1

Find the integers that would solve the problems.

1. Find two consecutive even integers whose sum is 30.
2. The sum of 2 and three times a number equals 11. Find the number.
3. The sum of two consecutive integers is 17.
4. The sum of two consecutive integers is 3.
5. The difference between five times a number and 53 is equal to 2. Find the number.
6. Find two consecutive negative integers whose sum is -27.
7. The sum of fifteen and three times a number is equal to 24. Find the number.
8. Find two consecutive even integers whose sum is 66.
9. Find two consecutive odd integers that have the sum of 16.
10. The sum of 10 and a number divided by two is thirteen. Find the number.

Topic : Integer Word Problems- Worksheet 2

Find the integers that would solve the problems.

1. Find two consecutive even integers whose sum is 6.
2. The sum of 3 and four times a number equals 11. Find the number.
3. The sum of two consecutive integers is 13.
4. The sum of two consecutive integers is 9.
5. The difference between two times a number and 20 is equal to 4. Find the number.
6. Find two consecutive negative integers whose sum is -33.
7. The sum of 12 and four times a number is equal to 28. Find the number.
8. Find two consecutive even integers whose sum is 26.
9. Find two consecutive odd integers that have the sum of 8.
10. The sum of 12 and a number divided by three is 7. Find the number.

Topic : Integer Word Problems- Worksheet 3

Find the integers that would solve the problems.

1. Find two consecutive even integers whose sum is 14.
2. The sum of 2 and three times a number equals 14. Find the number.
3. The sum of two consecutive integers is 15.
4. The sum of two consecutive integers is 19.
5. The difference between three times a number and 15 is equal to 6. Find the number.
6. Find two consecutive negative integers whose sum is -29.
7. The sum of 8 and three times a number is equal to 17. Find the number.
8. Find two consecutive even integers whose sum is 34.
9. Find two consecutive odd integers that have the sum of 4.
10. The sum of 10 and a number divided by four is 17. Find the number.

Topic : Integer Word Problems- Worksheet 4

Find the integers that would solve the problems.

1. Find two consecutive even integers whose sum is 18.
2. The sum of 3 and two times a number equals 9. Find the number.
3. The sum of two consecutive integers is 21.
4. The sum of two consecutive integers is 27.
5. The difference between two times a number and 18 is equal to 8. Find the number.
6. Find two consecutive negative integers whose sum is -37.
7. The sum of 10 and two times a number is equal to 26. Find the number.
8. Find two consecutive even integers whose sum is 30.
9. Find two consecutive odd integers that have the sum of 20.
10. The sum of 20 and a number divided by five is 25. Find the number.

Topic : Integer Word Problems- Worksheet 5

Find the integers that would solve the problems.

1. Find two consecutive even integers whose sum is 22.
2. The sum of 4 and three times a number equals 13. Find the number.
3. The sum of two consecutive integers is 33.
4. The sum of two consecutive integers is 23.
5. The difference between three times a number and 15 is equal to 30. Find the number.
6. Find two consecutive negative integers whose sum is -35.
7. The sum of 8 and three times a number is equal to 26. Find the number.
8. Find two consecutive even integers whose sum is 22.
9. Find two consecutive odd integers that have the sum of 28.
10. The sum of 20 and a number divided by five is 24. Find the number.
