### Integer Word Problems- Guided Lesson

Complete the following problems:

1) Robert and Nelson are in a same school. Both of them live in the same direction away from the school. The distance from school to Nelson's house is 12 km and it is only 3 km from Robert's house to school. How far does Nelson live from Robert?

2) 5 times a number increased by 18 is the same as 36 more than times 4 times the number. Find the number.

3) When 9 times a number is increased by 30, the answer is the same as when 140 is decreased by the number. Find the number.
