

Adding and Subtracting Measurements Word Problems Worksheet 2

1. Katie and her family have just moved to a new home. Katie's new room has the perfect spot for a computer desk. The desk is 36 inches off the ground. Her computer monitor is huge at $1\frac{1}{2}$ feet tall. How far off the ground will the top of the monitor be?

2. The golf team was taking practice distance shots. Phil drove the ball 100 meters, a great shot! Justin decided he would do his best and hope he could do better than Phil. Justin's shot went 10,000 centimeters. Whose ball went the furthest?

3. The science class was monitoring plant growth. Cindy's plant grew 3mm over the three day weekend. Jordan's plant only grew 0.001 meters during the same time. If Jordan's plant is to catch up to Cindy's, how many mm would it have to grow?
