Counting Coins and Dollars- Step-by-Step Lesson

Count the coins and bills and write how much is shown:

Explanation:

We have to count coins and bills by their value.

25¢   5¢   1¢

$10 $5 $5

Here, the value of 1 bill is 10 dollars and the other 2 bills have values of 5 dollars each.

$10+ $5+ $5 = $20

As we know that 1 quarter is equal to 25¢, 1 nickel is equal to 5¢ and 1 penny is equal to 1¢

25¢ + 5¢ + 1¢ = 31¢

The answer is $20.31
