## Counting Coins- Guided Lesson Explanation

### Explanation#1

We have to add the two coins value in cents

As we know that 1 nickel is equals to 5¢ and 1 quarter is equals to 25¢

$$5¢ + 25¢ = 30¢$$

So the answer is 30¢

### Explanation#2

We have to add the two coins value in cents

As we know that 1 penny is equals to 1¢ and 1 dime is equals to 10¢

$$1¢ + 10¢ = 11¢$$

So the answer is 11¢

### Explanation#3

We have to add the two coins value in cents

As we know that 1 nickel is equals to 5¢

$$5¢ + 5¢ = 10¢$$

So the answer is 10¢
