Making Change- Step-by-Step Lesson

Lesson 1 Making Change:

Krystal buys a teddy bear. Tell how much money she received back as change.

Krystal paid \$5.00

Explanation:

We basically need to find the difference between the money that Krystal paid and the cost of the Teddy Bear.

$$\$5.00 \text{ (Krystal paid)} - \$2.45 \text{ (Teddy Bear)} = \$2.55$$

So the answer is \$2.55
