Coin Money Bonds Step By Step Lesson

Complete the coin money bond below.

Explanation:

Each of the values on the outside of the coin value bond are added together to total the value in the center of the bond system.

Let's refer to the missing (empty) value as "x".

This means that: $x + 38¢ + 5¢ + 12¢ + 23¢ + 9¢ = 98¢$

Let's condense all the sums to a total:

$$x + 87¢ = 98¢$$

$$x = 98¢ - 87¢ \quad (\text{Get } x \text{ by itself})$$

$$x = 11¢$$
