## Simple Money Word Problem- Guided Lesson Explanation

### Explanation#1

We need to find the difference between what we started with and what we paid out.

Starting - Paid out = Money left

$$\$50.00 - 24.56 = \$25.44$$

### Explanation#2

As we know, a week contains 7 days.

$$\$14 \times 7 = \$98$$

### Explanation#3

We would divide the costs by the amount he makes each month.

Cost  $\div$  Amount Made Monthly = Total time.

$$200 \div 50 = 4$$

So the answer is 4 months.
