Simple Money Word Problem- Step-by-Step Lesson

Marilyn has 4 nickels. Her friend gives her 1 quarter, 3 pennies.

How much money does she have now?

Explanation:

Marilyn received new money. We need to add the two values together.

We know that 1 nickel is equals to 5¢, 1 quarter is equals to 25¢ and 1 penny is equals to 1¢.

She has the following coins:

4 nickels - worth 5 cents each for a total of: 20 cents

1 quarter – worth 25 cents for a total of: 25 cents

3 pennies- worth 1 cent each for a total of: 3 cents

To find the total, we add all the values.

20 cents + 25 cents + 3 cents

So the answer is 48¢.
