Multiplication as Repeated Addition - Guided Lesson Explanation

Explanation#1

We can see 2 images in each group. There are 2 groups, so we will add

$$\text{Addition: } 2 + 2 = 4$$

There are 2 groups and each group has 2 images so we multiply.

$$\text{Multiplication: } 2 \times 2 = 4$$

$$\text{Answer is: } 2 + 2 = 4$$

$$2 \times 2 = 4$$

Explanation#2

We can see 2 images in each group. There are 4 groups, so we will add:

$$\text{Addition: } 2 + 2 + 2 + 2 = 8$$

There are 4 groups and each group has 2 images so we multiply.

$$\text{Multiplication: } 4 \times 2 = 8$$

$$\text{Answer is: } 2 + 2 + 2 + 2 = 8$$

$$4 \times 2 = 8$$

Explanation#3

We can see 2 images in each group. There are 5 groups, so we will add:

$$\text{Addition: } 2 + 2 + 2 + 2 + 2 = 10$$

There are 5 groups and each group has 2 images so we multiply.

$$\text{Multiplication: } 5 \times 2 = 10$$

$$\text{Answer is: } 2 + 2 + 2 + 2 + 2 = 10$$
