Visual Multiplication - Step-by-Step Lesson
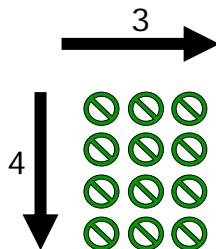

Solve the multiplication problem using the circles as guides.

4 rows of 3

$4 \times 3 =$ ___

Explanation:

We count every row to get the answer.

We can see that there are four rows having three images each.

After counting we find that there are 12 images.

3 x 4 = 12

So, we get the answer 12 by visual multiplication.
