Visual Multiplication Lesson

Each boy wants to reach each candy. Draw a line from each boy to each candy. How many lines did you draw?

Draw a line from 1 candy to each boy. Similarly draw lines from candies to each boy. Count the total number of lines drawn.

Lines from 3 candies to each of the 6 boys; i.e. 3 x 6 = 18 lines.

Practice Problems

1		Each lady wants to reach each jacket. Draw a line from the lady to each jacket. How many lines did you draw?	2		Each kid wants to reach each toy. Draw a line from each kid to each toy. How many lines did you draw?
