

Empty Cell Sudoku Strategy Lesson Part 2

Once we look at all the possible numbers that can appear in each box, we write them into a draft puzzle. They appear below.

1	3,4	2	3
2,3	1,2,3	1,3	4
3,4	1,3,4	1,3	2
2,3	2,3	4	1

For here you should review all the possibilities once again. Notice that there are squares that can only have one answer because of the numbers that appear on the sides or above/below it. Review the puzzle again with this in mind.

1	4	2	3
2,3	1,2,3	1,3	4
4	1,3	1,3	2
2,3	2,3	4	1

Continue to review the puzzle, each time start with a new fix number. This will lead you to this final solution:

1	4	2	3
2	3	1	4
4	1	3	2
3	2	4	1
