Adding & Subtracting Common Percents

The percentages in these problems are ones that are most commonly used in stores, restaurants and other places where money is exchanged (i.e. tips, sales tax, discounts, etc). Notice that the percents usually end in a zero or five. Round your answer to the nearest hundredth.

$24.99 - 10\% = \underline{\hspace{2cm}}$

$105.99 - 25\% = \underline{\hspace{2cm}}$

$12.79 - 15\% = \underline{\hspace{2cm}}$

$76.25 - 30\% = \underline{\hspace{2cm}}$

$3.50 - 25\% = \underline{\hspace{2cm}}$

$0.99 + 5.5\% = \underline{\hspace{2cm}}$

$59.25 - 50\% = \underline{\hspace{2cm}}$

$54.99 - 50\% = \underline{\hspace{2cm}}$

$84.95 + 15\% = \underline{\hspace{2cm}}$

$80.59 - 80\% = \underline{\hspace{2cm}}$

$23.20 - 35\% = \underline{\hspace{2cm}}$

$552.45 + 15\% = \underline{\hspace{2cm}}$

$105.93 + 5.5\% = \underline{\hspace{2cm}}$

$66.40 + 20\% = \underline{\hspace{2cm}}$

$56.54 + 7.5\% = \underline{\hspace{2cm}}$

$62.12 - 40\% = \underline{\hspace{2cm}}$

$90.65 - 20\% = \underline{\hspace{2cm}}$

$32.50 + 10\% = \underline{\hspace{2cm}}$

$22.95 - 75\% = \underline{\hspace{2cm}}$

$75.85 - 15\% = \underline{\hspace{2cm}}$

$564.55 + 15\% = \underline{\hspace{2cm}}$

$150.55 - 35\% = \underline{\hspace{2cm}}$
