Percentage at the Restaurant Guided Lesson

1. You go to the local Sport Grill for quarter wings day. All chicken wings are \$0.25. Your waiter also announces that for your stay there will be an additional 20% discount on wings. Your table of friends stays there for 2 hours and eats a total of 78 wings. How much do you expect the bill to be for your wings?

2. You have wonderful service at a local eatery and receive the bill for \$82.64. Because the service was excellent you would like to give the waiting staff a 22% tip. What will the total (tip + bill) cost be for you dinner?

3. You haven't seen your 5 friends in a long time. You decide to all go out for a nice lunch. When the bill comes, you all agree on a tip and plan to split the cost of the bill evenly. The total bill (tip included) comes out to \$173.40. What is the final cost to you?
