## Leaving Tips Worksheet 2

**Directions:** Read the story and solve each problem along the way.

You're at your favorite restaurant, but you're not sure how much you should tip. The food was great and the service was acceptable, but you want to see how other people are tipping, so you ask around the restaurant.

1. John and Sally each had a salad and two waters as well as a piece of cheesecake for dessert, which came to \$20.50. Their salads were delicious, but their cheesecake was not as fresh and it should have been. They decide to leave the standard 15% tip. How much of a tip will they leave and how much is their total?

Tip: \_\_\_\_\_ Total: \_\_\_\_\_

2. Miranda and David are celebrating their child's third birthday. They have a group of 15, and everyone orders their individual entrees. Miranda and David decide to pick up the bill, which came to \$190.76. The food and service was excellent, so they decide to leave a 25% tip. How much of a tip will they leave and how much is their total?

Tip: \_\_\_\_\_ Total: \_\_\_\_\_

3. Lacey is in town on a business trip. She orders a sandwich, chips and a milkshake, which comes to \$12.25. She is pleased with the food and service and is impressed that they have free Wi-Fi, so she can work on her laptop. She decides to leave an 18% tip. How much of a tip will they leave and how much is their total?
