

Name _____

Date _____

Rounding To the Nearest 100s Lesson

There were 164 people standing at an airport terminal on Monday and 312 people on Tuesday. How many people were there in all? Round the answer to the nearest hundreds place.

People in queue on Monday = 164

People in queue on Tuesday = 312

Rounding the number of people in queue on Monday = $164 \approx 200$

Rounding the number of people in queue on Tuesday = $312 \approx 300$

Total number of people rounded to nearest hundred = $200 + 300$
= 500

Practice Problems

Round the answer to the nearest hundred.

1	Shirley has 287 peanuts. Heather has 636 peanuts. How many peanuts do they have in all?
2	In September Mom used the Internet for 253 hours, in October for 128 hours, in November for 319 hours, and in December for 135 hours. How many hours approximately did she use it total during those four months?
