Elapsed Time- Step-by-Step Lesson

Paul goes to his music class at 2.00 P.M. and he returns at 3.30 P.M.

What is the length of the duration of his class?

Explanation:

We are looking for an elapsed time.

The following method can be used to find this:

Elapsed time = Start time - end times

The starting time of class is 2:00 P.M.

The ending time of class is 3:30 P.M.

$$= 3:30 - 2:00$$

$$= 1:30$$

So, the answer is 1 hour and 30 minutes.
